CHARACTER CREATION

Follow these steps to create your character:

1. **Select a Class:** Determine your character's primary role and core abilities.
2. **Choose an Origin:** Select a background to define your character's history and starting proficiencies.
3. **Select a Species:** Choose your character's biological heritage.
4. **Determine Languages:** Each character knows at least three languages: Common, a species-specific language, and one additional standard language of your choice.
5. **Generate Ability Scores:** Determine your stats using the Point Buy system, the standard array, or by rolling.

STANDARD ARRAY

The standard array for ability scores is:

15, 14, 13, 12, 10, 8 .

POINT BUY SYSTEM

Use the interactive calculator below to allocate your ability scores using the standard D&D 5e point-buy system:

POINT BUY

SPEND THE 27-POINT POOL ACROSS ALL SIX ABILITIES.

POINT BUY RULES

- You have 27 points to spend on ability scores.
- Each ability score starts at 8.
- You can increase scores up to 15 (before racial bonuses).
- Higher scores cost more points (see cost below each ability).

STATS

LAST 50 ROLLS

No stats yet! Roll all abilities to see your results.

STAT ROLLING RULES

- Select your class before rolling stats.
- Stats are rolled in order, rolling 4d6 dice and keeping the 3 highest for each stat.
- After that, the player can also swap any Ability Score for another one.

MULLIGAN

Players may discard their rolled ability scores and use the Mulligan array instead:

15, 14, 12, 12, 10, 8 .

HIT POINTS ROLLING

When leveling up, instead of taking the average value, a character rolls its hit point increase.

The character rolls its hit die and makes the following adjustment:

CLASSES ROLLING D6'S OR D8'S

If the result is odd, round up to the next even number.

Example

A roll of 3 on a d6 is rounded up to 4. A roll of 2 remains unchanged.

CLASSES ROLLING D10'S OR D12'S

Add +1 to the roll. The modified total cannot be higher than the highest value of the dice.

Example

E.g. If the player rolls a 6 on a d10, it's increased to 7. If it rolls a 10, the result is unchanged.

CLASSES

PALADIN

LEVEL 1: LAYING ON HANDS

Must be used in 5 hit point chunks. There's no limit on the number of 5-point chunks the character can use per healing.

LEVEL 2: PALADIN'S SMITE

You always have the Divine Smite spell prepared. In addition, you can cast it

You can choose a melee weapon type to be your weapon of honor. In addition to the regular mastery associated with your weapon of honor, you can forfeit the mastery in another weapon to give your weapon of honor a second mastery of your choice.

CLERIC

LEVEL 1: DIVINE ORDER

THAUMATURGE

You can prepare one additional spell from any **Divine Magic** or **Primordial Magic** class including those available only to certain subclasses. You always have the spell prepared and it must be a spell of a

without expending a spell slot a number of times equal to your proficiency bonus, but you must finish a Long Rest before you can cast it in this way again.

LEVEL 5: WEAPON OF HONOR

Important note

Replaces Faithful Steed

level you are able to cast. You can change that spell for another eligible spell when you level up. In addition, your mystical connection to the divine gives you a bonus to your Intelligence (Arcana or Religion) checks. The bonus equals your Wisdom modifier (minimum of +1).

PROTECTOR

You can learn the **True Strike** cantrip.

LINGERING INJURIES

Lingering injuries represent physical trauma that extends beyond immediate recovery. In real-world medical terms, these are chronic or severe acute conditions - such as compound fractures, deep tissue scarring, or neurological damage - that require specialized treatment and extended periods of rehabilitation. Unlike transient injuries, they often impose long-term functional limitations on the individual.

A character sustains a lingering injury under the following conditions:

- Being reduced to 0 hit points.
- Taking damage equal to or greater than $(8 + \text{Constitution modifier})$ while at 0 hit points.
- Triggering a moderate, severe, or deadly trap.
- A critical hit or fumble result specifies an injury.

INJURY TREATMENT

MEDICAL TREATMENT (MEDICINE)

- Medical treatment requires the expenditure of Healer's Kit uses for every medicine check attempted.
 - Light injuries can be treated as an action during combat. All other injuries can only be treated during a short or long rest. Only one check per injury can be attempted on each rest.
 - Injuries marked with the Ø symbol cannot be treated without magical healing.
 - A character proficient in medicine can spend 1 use of the Healer's Kit to automatically stabilize a dying character. If not proficient, the character rolls a WIS check vs DC 10 (or DC 15 if an enemy is within 5 feet of you or your target).
 - A Healer's kit can also be used to restore 1d4 hp to a stabilized character with 0 hit points. It requires medicine check DC 15 (DC 10 when out of combat)
-

MAGICAL TREATMENT (POTIONS AND HEALING SPELLS)

⚠ Caution

Lingering injuries can only be treated after the target has been **stabilized**.

- **Scope.** Magical treatment includes targeted spells, potions, and ointments.
- **Targeting.** Only single-target healing effects can treat lingering injuries.

Area-of-effect (AoE) spells provide general recovery but lack the precision required to mend structural damage.

- **Lesser Restoration.** Each casting counts as one success toward treating Moderate or Severe injuries. It cannot treat injuries marked with the Ø symbol.
- **Greater Restoration.** Each casting counts as one success toward treating Critical injuries.

INJURY SEVERITY TABLE

Severity	Medical Treatment	# of successes required	Magical Treatment
Light	DC 15 in combat. DC 10 outside combat	1	Any targeted healing spell or healing potion while stable
Moderate	DC 13	2	Lesser Restoration, Potion of Greater Healing, Keogthom ointment while stable
Severe	DC 15	3	Greater Restoration or Potion of Superior Healing while stable
Critical	DC 18	4	Heal or Regenerate (depending on the injury). Potion of Supreme Healing while stable

LINGERING INJURIES

MAGIC

GENERAL MAGIC RULES

AUTOMATIC MISS LIMITATIONS

Features that trigger an effect on a missed attack, such as the *Potent Cantrip* feature, do not function when an attack results in an automatic miss.

AREA-OF-EFFECT SPELL MITIGATION

No feature provides absolute immunity to area-of-effect spells for allies. The Evoker's **Sculpt Spells** and the Sorcerer's **Careful Spell** instead grant affected allies Advantage on the saving throw and the **Evasion** feature for that instance.

Note

When subjected to an effect that allows a Dexterity saving throw to take only half damage, the target takes no damage on a

success and only half damage on a failure. This version of Evasion functions even while incapacitated, and the target makes the saving throw normally.

SPELLS

BLADE WARD

The penalty to the attack roll is changed from **-1d4** to a flat **-1**.

CEREMONY

The number of vials created per casting equals your spellcasting modifier. The material component cost is 25 gp of powdered silver per vial.

HYPNOTIC PATTERN

It allows for a ongoing save at the end of each turn.

RAY OF ENFEEBLEMENT

This spell no longer requires concentration.

TRUE STRIKE

The damage dealt by this spell is of the same type as the weapon used. If the weapon is magical, the damage is also considered magical.

RESURRECTION

REVIVIFY

Casting *Revivify* requires the caster to sacrifice a portion of their life force. The

Upon a character’s third resurrection attempt, the restoration is no longer automatic. The target must immediately make Death Saving Throws to determine if the soul successfully returns. On a failure, the spell is consumed without effect and the character remains dead.

The difficulty of the resurrection depends on the spell used:

Spell	Difficulty
<i>Revivify, Raise Dead, or</i>	Standard Death Saving Throws

caster suffers a permanent -1 penalty to a randomly determined ability score.

THREE STRIKES AND YOU ARE OUT

<i>Reincarnate</i>	
<i>Resurrection</i>	The target makes the saves with Advantage
<i>True Resurrection</i> or <i>Wish</i>	Automatic success; no rolls required

INSTANT DEATH

Characters killed by the Instant Death rule cannot be restored to life using the *Revivify* spell. Higher-level resurrection magic is required to return them to life.

RESURRECTION WEAKNESS

If a character dies while still suffering the penalties of a resurrection spell, their Constitution score is permanently reduced by 1.

SPELLCASTING SERVICES

The pricing for spellcasting services is calculated using the following formula, replacing the costs listed in the *Player's Handbook* (p. 232):

Note

Price = (Spell Level² × 25)
+ Consumed Material Component Cost
+ (10% × Non-consumed Material Component Cost)

1	25
2	100
3	225
4	400
5	625
6	900
7	1225
8	1600
9	2025

Note

Spells cast as rituals cost 50% of the base service price. Material component costs remain unchanged.

Spell Level	Base Price without components
-------------	-------------------------------

MASTER ARMOR TABLE

LIGHT ARMOR

Armor	AC ¹	Dex ²	Stealth	Weight	Cost	Special
Padded	1	Full	Disadvantage	8 lb.	5 gp	RESIST: 1 bludgeoning, piercing, slashing
Leather	1	Full	—	10 lb.	10 gp	RESIST: 2 fire, cold, lightning
Studded Leather	2	Full	—	13 lb.	45 gp	-

MEDIUM ARMOR

Armor	AC ¹	Dex ²	Stealth	Weight	Cost	Special
Hide	2	3	—	12 lb.	10 gp	Counts as <i>cold weather gear</i> . Easy maintenance: Can be repaired on short rests
Chain Shirt	3	2	—	20 lb.	50 gp	Easy maintenance: Can be repaired on short rests
Scale Mail	4	2	Disadvantage	45 lb.	50 gp	-
Breastplate	4	2	—	20 lb.	400 gp	-
Half-Plate	5	2	Disadvantage	40 lb.	750 gp	-

HEAVY ARMOR

Armor	AC ¹	Dex ²	Stealth	Weight	Cost	Special
Ring Mail	4	2	Disadvantage	40 lb.	30 gp	-
Chain Mail	6	0	Disadvantage	55 lb.	75 gp	Easy maintenance: Can be repaired on short rests
Splint	7	0	Disadvantage	60 lb.	200 gp	-
Plate	8	0	Disadvantage	65 lb.	1,500 gp	-

Characters in heavy armor take less severe critical hit effects

Magical Armor

When wearing magical armor or shields, they are damaged only if struck by magical weapons, adamantine weapons, firearms, imbued magical effects on weapons (like paladin’s smite) or natural attacks from creatures of CR 8 or higher

SHIELDS

Armor	AC ¹	Notes	Weight	Cost	bonus action	
Light Shield	1	Equip as	3 lb.	5 gp	Medium Shield	2
						6 lb.
						10 gp
					Tower Shield	3 (4 vs -2
						ranged) ATK
						20 lb.
						25 gp

ARMOR SIZES

Pag 219 PHB

Note

Adapting a suit of armor to fit a different size has a cost of 10% the price of the armor for each size difference. The time cost is (1 day/size difference) for light armor and easy maintenance armor and (2 days/size difference) for the rest.

Size	Species	Extra cost
XS	Halfling, Gnome, Small Aasimar, Goblin	+10%
S	Dwarf, Duergar, Derro, Small Human	+10%

M	Elf, Medium Human, Half-Elf, Medium Aasimar, Genasi, Gith, Hobgoblin	+10%
L	Orc, Goliath, Firbolg, Bugbear	+10%
Tail Adaptation	Tabaxi(M), Tiefling(M), Dragonborn(L), Gnoll(M), Lizardfolk(L)	+10%
Wing Adaptation	Aaracokra(M), Kenku(M), Avariel(M)	+20%

1. Armor Class Bonus   2  3  4

2. Maximum Dex Bonus   2  3

SKILLS

ROLLING SKILL CHECKS WITHOUT PROFICIENCY

There are some skills which require knowledge or practice which is very

specialized (somebody without previous training cannot seriously play a violin or know arcane lore without having studied it before).

The following skills fall into this category, and cannot be rolled without proficiency:

- **Arcana, History, Medicine, Nature, Performance, Religion, Play Instrument and almost all tools.**
- **Thieves' Tools** can be used with **Sleight of Hand** without adding the proficiency bonus.

ATTUNEMENT

You can attune to an item during a short or long rest.

Attuning to a item requires a number of successful checks depending on item rarity, as indicated the table below.

The DC of this check is 15.

The character must achieve a specific number of consecutive successes. To resolve the attempt, perform either an **Arcana check** or a check using your **spellcasting ability modifier plus your proficiency bonus**.

OVERCHANNELING ATTUNEMENT

If an initial attunement roll fails, you may choose to Commit All Energies. Doing so guarantees eventual attunement but carries a risk of physical collapse.

THE PROCEDURE

1. **Resolve Successes:** Continue rolling until the required number of successes is met.
 2. **Calculate Penalties:** Total the number of failures accrued during the process.
 3. **Endurance Check:** For each failure, perform a CON Saving Throw against the item's CON Save DC.
 4. **Failure:** Gain one level of exhaustion.
 5. **Critical Exhaustion:** If your exhaustion exceeds level 5, perform a WIS Saving Throw against the item's CON Save DC.
 6. **Success:** You break the item's influence and stabilize at level 5 exhaustion.
 7. **Failure:** You succumb to the item (Death by Exhaustion).
 8. **Recovery:** Exhaustion gained through this process is specialized. It is removed entirely by a single casting of Greater Restoration or a completed Long Rest. This specific exhaustion must be fully cleared before any exhaustion from other sources can be reduced.
-

Item Rarity	Successes required	CON SAVE DC	Very Rare	4	15
			Legendary	4	18
Common	Automatic	-	Artifact	5	20
Uncommon	2	10			
Rare	3	12			

FORAGING FOR INGREDIENTS

After completing a foraging period, perform a **Wisdom (Survival)** check against the **Biome DC**. On a success, the character recovers a quantity of raw materials suitable for use with an **Herbalism Kit** or **Poisoner's Kit**.

CALCULATE VALUE OF GATHERED INGREDIENTS

Yield Calculation: The total value of gathered ingredients is determined by the following formula:

$$5 \text{ gp} + (1 \text{ gp} * \text{Margin of Success})$$

The “*Margin of Success*” is the difference between the check result and the Biome DC.

Rare Finds: If the final check result is 25 or higher, the character discovers a **Rare Ingredient** in addition to the standard yield. Consult the **Rare Ingredient Value Table** below to determine its specific properties and worth.

RARE INGREDIENT VALUE TABLE

Biome	Survival DC	Rare Ingredient (25+)
Plains	10	25 gp
Hills	15	50 gp
Mountains	20	100 gp
Riverside	10	30 gp

Coast	15	25 gp
Desert	20	100 gp
Jungle	10	100 gp
Conifererous Forest	18	50 gp
Decidious Forest	10	50 gp
Tundra	20	100 gp
Marsh	12	75 gp
Badlands	18	50 gp
Underground	15	75 gp

CRAFTING

PHB 233

Note

Crafting non-magical items takes a number of workdays (8h/day) equal to:

The purchase price of the item /

10 Another character can combine its efforts halving the crafting time and but It must be proficient with the required tools.

Note

To make an item, you need raw materials worth half the purchase cost of the item (rounded down). The DM determines wheter the appropriate raw materials are available.

Failing the crafting roll doesn't mean the effort is wasted. The crafter may simply need extra time and resources to finish the

item. Determine the margin of failure and check the table below:

Margin of Failure	Result		
1	Add +10% cost in raw materials	3-4	Add +25% cost in raw materials and take 50% extra time or 2 extra days, whichever is lower
2	Add +10% cost in raw materials and take 50% extra time or an extra day, whichever is lower	5	Add +25% cost in raw materials and take 50% extra time or 1 extra day, whichever is higher
		6+ or natural 1	Total failure. Materials and work are hopelessly wasted

BREWER’S SUPPLIES
(INTELLIGENCE)

Utilize: Detect poisoned drink (DC 15), or
identify alcohol (DC 10)

Craft	Materials Cost	Workday
Antitoxin	25 gp	1
Beer	1 gp/gallon	1

Firearm Bullets	15 sp	1	Automatic Success
Grappling Hook	1 gp	1	DC 12
Iron Pot	1 gp	1	DC 10
Iron Spikes	5 sp	1	Automatic Success
Sling Bullets	0 gp	1	Automatic Success

TINKER'S TOOLS (DEXTERITY)

Utilize: Assemble a tiny item from scraps
(DC 20)

Craft	Materials Cost	Workday	Difficulty Class
Musket	250 gp	50	DC 20
Pistol	125 gp	25	DC 20
Bell	5 sp	1	DC 10
Bullseye Lantern	5 gp	1	DC 12
Flask	5 gp	1	DC 15
Hooded Lantern	25 sp	1	DC 10
Hunting Trap	25 sp	1	DC 12
Lock	5 gp	1	DC 15
Manacles	1 gp	1	DC 12
Mirror	25 sp	1	DC 10
Shovel	1 gp	1	DC 10
Signal Whistle	0 gp	1	Automatic Success
Tinderbox	2 sp	1	Automatic Success

SKILLS

WEAVER'S TOOLS (DEXTERITY)

Utilize: Mend a tear in clothing (DC 10).

Sew a tiny design (DC 10).

Craft	Materials Cost	Workday	Difficulty Class
Padded Armor	25 sp	1	DC 10
Basket	2 sp	1	DC 10
Bedroll	5 sp	1	DC 10
Blanket	2 sp	1	Automatic Success
Fine Clothes	75 sp	2	DC 20
Net	5 sp	1	DC 12
Robe	5 sp	1	DC 10
Rope	5 sp	1	DC 12
Sack	0 gp	1	Automatic Success
String	1 sp	1	Automatic Success
Tent	1 gp	1	DC 15
Traveler's Clothes	1 gp	1	DC 15

SKILLS

WOODCARVER'S TOOLS (DEXTERITY)

Utilize: Carve a pattern in wood (DC 10)

Craft	Materials Cost	Workday	Difficulty Class
Club	0 gp	1	Automatic Success
Greatclub	1 sp	1	DC 10
Quarterstaff	1 sp	1	DC 10
Shortbow, Light	125 sp	3	DC 15
Crossbow			
Longbow, Heavy	25 gp	5	DC 18
Crossbow			
Hand Crossbow	375 sp	8	DC 20
Arcane focus	25 sp to 10 gp	1-2	DC 15
Druidic focus	5 sp to 5 gp	1	DC 15
Arrows (20) or Bolts (20)	5 sp per 20 arrows/bolts	1 (per 20 arrows/bolts)	DC 10
Shield	5 gp	1	DC 15

THE ADVANCED TOOLS

The tools in this chapter allow to craft magical items, such as potions, poisons and spell scrolls.

HERBALISM KIT (INTELLIGENCE)

Note

Crafting potions takes a number of workdays (8h/day) equal to: The purchase price of the item / 50

Another character can combine its efforts halving the crafting time and but It must be proficient with the required tools.

Note

To make an item, you need raw materials worth half the purchase cost of the item (rounded down). The DM determines wheter the appropriate raw materials are available.

Utilize: Identify a plant (DC 10)

Craft	Materials Cost	Workday	Difficulty Class
Antitoxin	25 gp	1	DC 10 (Automatic Success if proficient in Nature)
Candle	0 sp	1 (per 10 candles)	Automatic Success
Healer's Kit	25 sp	1	DC 10
Potion of Healing	25 gp	1	DC 10 (Automatic Success if proficient in Nature)
Potion of Greater Healing	75 gp	3	DC 15 (DC 10 if proficient in Nature)
Potion of Superior Healing	375 gp	15	DC 20 (DC 15 if proficient in Nature)
Potion of Supreme Healing	750 gp	30	DC 25 (DC 20 if proficient in Nature)
Keogthom Ointment	80 gp	3	DC 15 (DC 10 if proficient in Nature)
Herbal Healing Poultice	50 gp	2	DC 12 (DC 10 if proficient in Nature)
Herbal Tonic	25 gp	1	Automatic Success
Potion of Stamina	50 gp	2	DC 12
Potion of Greater Stamina	125 gp	5	DC 15
Other	Varies	-	-

POISONER'S KIT (INTELLIGENCE)

Note

Crafting poisons takes a number of workdays (8h/day) equal to: $\text{The purchase price of the item} / 100$

Another character can combine its efforts halving the crafting time and but It must be proficient with the required tools.

Note

To make an item, you need raw materials worth half the purchase cost of the item (rounded down). The DM determines wheter the appropriate raw materials are available.

Utilize: Detect a poisoned object (DC 10)

Craft	Materials Cost	Workday	Difficulty Class
Antitoxin	25 gp	1	DC 10 (Automatic success if proficient in Nature)
Basic Poison	50 gp	1	DC 10 (Automatic success if proficient in Nature)
Drow Poison	100 gp	2	DC 15
Belladonna	225 gp	5	DC 15 (DC 10 if proficient in Nature)
Bloodstinger Poison	50 gp	1	DC 10 (Automatic Success if proficient in Nature)
Purple Worm Poison	1,000 gp	20	DC 20 (DC 15 if proficient in Nature)
Wyvern Poison	680 gp	12	DC 18 (DC 12 if proficient in Nature)
Othur Mold Spores	225 gp	5	DC 15 (DC 10 if proficient in Nature)
Serpent Venom	35 gp	1	DC 10 (Automatic success if proficient in Nature)
Pale Tincture	325 gp	7	DC 15

CALLIGRAPHER’S SUPPLIES (DEXTERITY)

Utilize: Write a text with impressive flourishes that guard against forgery (DC 15)

Craft	Materials Cost	Workday	Difficulty Class
Ink	5 gp	1	Automatic Success

Magic Inks	Varies	1	DC 10 (Automatic success if proficient in Arcana or Religion)
Spell Scroll	See table below	-	-

CRAFTING SPELL SCROLLS

A spellcaster can transfer a spell to a scroll and create a *Spell Scroll*.

Note

The scroll's spell uses the unmodified Spell Save DC or Spell Attack Bonus of the scroll creator. If the inscribed scroll is a cantrip, the cantrip is cast as if the caster were the spell's creator level.

Note

The DC for inscribing a scroll is $10 +$ spell level

PREREQUISITES FOR THE SCRIBE

- To scribe an arcane spell scroll, you must have proficiency in the Arcana skill. If you also have proficiency in Calligrapher's supplies the check is automatically successful.
- To scribe a divine spell scroll, you must have proficiency in the Religion skill. If you also have proficiency in Calligrapher's supplies the check is automatically successful.

You must have the spell prepared in each day of the inscription, and you must also

have at hand any Material Component required by the spell;

Note

If the spell consumes its Material Components, they are consumed only when you complete the scroll.

SPELL SCROLL COSTS

Spell Level	Time	Cost	Difficulty Class
Cantrip	1 workday	10 GP	DC 10
1st	1 workday	20 GP	DC 11
2nd	3 workdays	75 GP	DC 12

3rd	5 workdays	200 GP	DC 13
4th	10 workdays	350 GP	DC 14
5th	25 workdays	600 GP	DC 15
6th	40 workdays	1.250 GP	DC 16
7th	50 workdays	2.500 GP	DC 17
8th	60 workdays	5.000 GP	DC 18
9th	120 workdays	12.500 GP	DC 19

ALCHEMIST’S SUPPLIES (INTELLIGENCE)

Note

Crafting time depends on the potion rarity. See the Alchemy Crafting Table Below. Time is in workdays of 8 hours. Another character can combine its efforts halving the crafting time and but It must be proficient with the required tools.

Note

To make an item, you need three things:
An Alchemical Base, a Suitable Reagent
and an Appropriated Spell

Utilize: Identify a substance (DC 15), or
start a fire (DC 15)

BASIC ALCHEMICAL CRAFTING

Craft	Materials Cost	Workday	Difficulty Class
Acid	125 sp	1	DC 10
Alchemist’s Fire	25 gp	1	DC 12
Component’s Pouch	125 sp	1	DC 10
Oil	1 sp	1	Automatic Success
Paper	1 sp per 10 sheets	1 (per 10 sheets)	Automatic Success
Perfume	25 sp	1	DC 10

ALCHEMICAL POTIONS

Alchemical potions contain spells, mimic the effects of spells or have an effect out of the scope of normal spells, such as a Potion of Giant Strength. Brewing this

kind of potions is a process full of danger and ingenuity. The act of creating these magic items is called alchemy, and those who hone this craft are often alchemist artificers, wizards, or similarly intelligent specialists with an affinity for chemistry.

Magic is not a cooperative energy and doesn't appreciate being forced into a tiny bottle for consumption. Despite the best efforts of countless crafters, the process of brewing potions has never been successfully automated, with any attempt leading to catastrophic results. Brewers must slave over their work, watching for a sign of things about to go terribly wrong. The difficulty and time required to complete this process is determined by the potion's rarity.

Note

A series of successful Intelligence ability checks (typically three) is required to

complete this process, along with an extended waiting period while the potion brews.

The nature of the ability checks represents the 3 steps necessary to complete the process: The creation of the Potion's base, the addition of the bonding agent and the infusion of magic into the potion. At minimum this requires a set of alchemist's supplies, but many experienced crafters use something far more elaborate and safer laboratories, with specialized equipment to make this checks easier.

Danger

Additionally, when a creature attempting to brew a potion fails an Intelligence ability check by 10 or more, the potion explodes catastrophically, destroying any tools or equipment that were being used to create it.

Finally, an alchemist crafting a potion must acquire specific and potent ingredients. These components are used in various stages of the brewing process, forming the potion's base and bonding agent, the details of which follow. Note that these do not

encompass all the ingredients required to create a potion, merely the most significant ones. The difficulty DC and time required to brew a potion according to its rarity are detailed in the Alchemy Crafting table.

ALCHEMICAL CRAFTING TABLE

Rarity	Ability Check DC	Brewing Time ¹	Minimum CR for reagent	Potion Spell Level
Common	DC 12	0.5	< CR 1	Cantrip
Uncommon	DC 14	1	CR 1-3	1st-2nd
Rare	DC 17	7	CR 4-9	3rd-4th
Very Rare	DC 20	14	CR 10-16	5th-6th
Legendary	DC 25	30	CR 17-22	7th-8th
Epic	DC 30	90	CR 23+	9th-Epic 1st
Mythic	DC 35	180	Mythic	Epic 2nd-Epic 3rd

Note

Elixirs require twice the preparation time.

STEP 1 - ALCHEMICAL BASE

Making a potion with ordinary water is a literal recipe for disaster. Mystical fluids with strange properties are far more effective. Rarer potions require bases that are incredibly dangerous, expensive, or both. The blood of a troll, a compound synthesized through transmutation magic, or the rain from a magic-soaked world are all examples of appropriate bases for brewing potions. When crafting potions, the first Intelligence ability check performed should be themed around preparing or synthesizing this alchemical base.

Note

At the end of this process roll and Alchemist's supplies or Brewer's

supplies tool check

STEP 2 - BONDING REAGENT

Binding magic to an alchemical base requires a potent agent through which the magic will flow. These bonding agents are often harvested from magical creatures and are consumed in the process of brewing the potion. The school of magic that best fits the potion's magical effect determines what kind of creature a bonding agent must be harvested from, as detailed in the Bonding Agent Harvesting table. Additionally, the rarity of the potion determines the strength of the creature from which the bonding agent must be harvested.

Note

At the end of this process roll and Alchemist's supplies tool check

BONDING AGENT HARVESTING		Evocation	Dragon, Elemental, Ooze, Giant
Magical Effect Affinity	Creature Type	Illusion	Fey, Elemental, Aberration, Fiend
Abjuration	Construct, Monstrosity, Plant, Celestial	Necromancy	Undead, Fiend, Aberration, Monstrosity
Conjuration	Elemental, Fiend, Celestial, Aberration	Transmutation	Ooze, Aberration, Monstrosity, Dragon
Divination	Celestial, Beast, Plant, Undead		
Enchantment	Fiend, Fey, Plant, Aberration		

STEP 3 - MAGIC INFUSION

The last step of alchemy is infusing magic to the base + reagent. The alchemist must cast a spell of the same level as the potion spell level and it must be from the school of magic the reagent has affinity for.

Note

At the end of this process roll and Alchemist's supplies tool check or Arcana skill check

OTHER TOOLS

DISGUISE KIT (CHARISMA)

Utilize: Apply makeup (DC 10)

Utilize: Mimic 10 or fewer words of someone else's handwriting (DC 15), or duplicate a wax seal (DC 20)

GAMING SET (WISDOM)

Utilize: Discern whether someone is cheating (DC 10) or win the game (DC 20).

Craft:

- Costume (varies)

FORGERY KIT (DEXTERITY)

MUSICAL INSTRUMENT (CHARISMA)

Utilize: Play a known tune (DC 10) or improvise a song (DC 15)

NAVIGATOR'S TOOLS (WISDOM)

Utilize: Plot a course (DC 10) or determine position by stargazing (DC 15)

THIEVES' TOOLS (DEXTERITY)

Utilize: Open locks or disarm traps (DC varies)

1. Elixirs require twice this time 

WEAPON MASTER PROPERTY

Due to the current difficult of remember weapon master properties in PHB2024, it's best to group weapons by type and balance effects.

Caution

Weapons are grouped for convenience. Remember that masteries apply **ONLY** to a specific weapon of your choice.

WEAPON MASTER TABLE

#	Weapon Group	Weapons in Group	Weapon Mastery
	Blunted weapons	Club, Greatclub, Light Hammer, Mace, Flail, Morningstar, Warhammer, War Pick, Maul	Sap
	Bladed weapons	Dagger, Sickle, Greatsword, Longsword, Shortsword, Scimitar, Rapier	Parry
	Axes	Handaxe, Battleaxe, Greataxe	Keen
	Pole arms	Spear, Quarterstaff, Glaive, Halberd, Lance, Pike, Trident	Cleave
	Bows	Shortbow, Longbow	Vex
	Crossbows	Hand Crossbow, Light Crossbow, Heavy Crossbow	Fast Reload

#	Weapon Group	Weapons in Group	Weapon Mastery
	Exotic	Javelin, Sling, Dart, Blowgun, Whip, Shuriken	Graze
	Firearms	Pistol, Blunderbuss, Musket	Powerful

WEAPON MASTERIES

GRAZE

If your attack roll with this weapon misses a creature and its not an automatic miss, you can deal damage to that creature equal to the ability modifier you used to make the attack roll. This damage is the same type dealt by the weapon, and the damage can be increased only by increasing the ability modifier.

CLEAVE

If you hit a creature with a melee attack roll using this weapon, you can make a melee attack roll with the weapon against a second creature within 5 feet of the first that is also within your reach. On a hit, the second creature takes the weapon's damage, but don't add your ability modifier to that damage unless that modifier is negative. You can make this extra attack only once per turn.

VEX

If you hit a creature with this weapon and deal damage to the creature, you have Advantage on your next attack roll against that creature before the end of your next turn.

KEEN

Critical range is increased by 1

PARRY

As a reaction after being hit by a melee attack, you can add +2 to your AC, potentially causing the attack to miss.

FAST RELOAD

When you take the attack action using a reload weapon, you can reload the weapon as a bonus action and make a second attack as part of the attack action if you are able (e.g. extra attack feature, haste, etc.)

SAP

When you hit an enemy with an attack, this mastery property inflicts Disadvantage on your target's next attack roll before the start of your next turn.

POWERFUL

This mastery is exclusively for firearms.

You roll exploding damage dice (if you roll maximum damage, roll another damage dice) and critical damage dice always do maximum damage

CHANGING WEAPON MASTRIES

A character can change its weapon masteries when it gains a level.

WEAPON PROPERTIES

SIMPLE MELEE WEAPONS

Weapon	Damage	Property
Greatclub	1d8	Exploding
Light Hammer	1d4	Exploding
Mace	1d6	Exploding
Sickle	1d4	Reroll 1 on the damage dice

Exploding: When you roll the maximum value on a damage die, you roll an additional die of the same type and add it to the total damage. This effect is recursive; if the additional die also results in a maximum value, you continue to roll and add further dice until a maximum value is no longer rolled.

MARTIAL MELEE WEAPONS

Weapon	Damage	Property
Handaxe	1d6	Maximum damage on critical damage dice
Battleaxe	1d8	Maximum damage on critical damage dice
Greataxe	1d12	Maximum damage on

		critical damage dice
Morningstar	1d8	Exploding
Flail	1d8	Exploding

Exploding: When you roll the maximum value on a damage die, you roll an additional die of the same type and add it to the total damage. This effect is recursive; if the additional die also results in a maximum value, you continue to roll and add further dice until a maximum value is no longer rolled.

MARTIAL RANGED WEAPONS

Weapon	Damage	Property
Musket	2d6 (instead of 1d12)	Critical range +1
Pistol	1d10	Critical range +1

WEAPON PROPERTIES

MARTIAL RANGED WEAPONS
